Sir:

Applicant respectfully disagrees with the Examiner's statement of reasons for allowance and/or Applicant believes that the Examiner's statement of reasons for allowance is incomplete.

Applicant respectfully submits that the cited art does not teach or suggest the combinations of features set forth in the Applicant's claims. By way of nonlimiting example, Applicant submits the submitted references at least do not appear to teach or suggest the feature of: sequentially reading at least two of the smart triggers from the first memory; and, for each of the smart triggers read from the first memory: comparing the scheduled date for processing the smart trigger to the current date; and executing the FSO related processing task associated with the smart trigger to process the data contained in the data set records associated with one or more of the data set identifiers associated with the smart trigger in response to reading the smart trigger

from the first memory if the scheduled date of the smart trigger is equal to or before the current date, but not executing the FSO related processing task in response to reading the smart trigger from the first memory if the scheduled date of the smart trigger is after the current date.
